As a team member of 3, I communicated with my team mates professionally and friendly. We had a friendly environment where each of us can share their idea openly and I encouraged my team members to share their thoughts and ideas. In a team, listening to the members is important as it helps to gain different perspective and different solution. I joined the weekly meetings on time, and updated my task status on time. I followed the timeline we planned as a group for the tasks. As a team we reviewed each others work to have a good outcome and when I give the feedback I gave constructive feedback in a polite way. I focused on the problem rather than blaming the person. So, as a team we can solve the problem effectively.
